

MY LYX THESIS

by

Test User

A dissertation submitted to the faculty of
The University of North Carolina at Charlotte
in partial fulfillment of the requirements
for the degree of Doctor of Philosophy in
Electrical Engineering

Charlotte

2015

Approved by:

Dr. Person A

Dr. Person B

Dr. Person C

ABSTRACT

TEST USER. My LyX Thesis. (Under the direction of DR. PERSON A)

Content of your abstract goes here.

LIST OF TABLES

TABLE 1.1: This is an example of a table.	1
TABLE 1.2: Example of short label.	1

CHAPTER 1: INTRODUCTION

This is my introduction. GNU is a major free software advocate [1].

1.1 Problem Statement

This is an example of a subsection.

Case #	Translational displemnt.	Total α	Total β	Total γ
6	83.09	885.66	252.07	264.64
7	63.12	337.48	244.95	381.31
8	70.45	240.08	217.59	294.56
12	15.71	86.89	74.58	112.03

Table 1.1: This is an example of a table.

R	Overall severity	KL-score
Translation	0.68	0.28
α	0.34	0.17
β	0.59	0.27
γ	0.53	0.29

Table 1.2: This is an example of a table having a long caption whose caption in the list of tables is much shorter (from the “opt” label). Correlation coefficient (R) comparison between displacement parameters and average overall ranking and KL score.

(a) Translational displacement vs. Savg; a linear fit

(b) Translational displacement vs. KL; a linear fit

Figure 1.1: Linear fitting translational displacement to KL and average overall severity.

CHAPTER 2: CONCLUSIONS

Lots of interesting conclusions will be put here.
